

SODOM & GOMORRAH

(Please read Genesis 13:13, 18:20-22, and 19:1-28)

The dead sea of Israel; view from the town of Masada.
The location of Sodom & Gomorrah is to the far right, at the southwest end of the dead sea.

The desolation of Sodom & Gomorrah, view from the town of Masada.

Entrance to the ruins of Gomorrah.

SODOM & GOMORRAH

(Please read Genesis 13:13, 18:20-22, and 19:1-28)

The building ruins of Gomorrah as it exists today.

The building ruins of Sodom as it exists today.

Millions of round impacts are all over the site of Sodom & Gomorrah.

SODOM & GOMORRAH

(Please read Genesis 13:13, 18:20-22, and 19:1-28)

Close-up of an impact reveals an embedded sulfur ball.

Burning a sulfur ball gives off a purplish flame, then melts through the spoon! (picture of a TV screen)

The impact sites of Sodom & Gomorrah show the top layer of rock to be ash, the middle layer to be molten rock, and the bottom layer to be normal sediment rock. In other words, evidence of a flaming sulfur ball shower engulfed the cities at a temperature hot enough to burn and melt the stone structures; estimated to be well above 2000 °F. (“Then the LORD rained upon Sodom and upon Gomorrah brimstone and fire...”Genesis 19:24)
